

SpacePole Stack™

Providing maximum flexibility at the Point of Payment

A payment terminal without a mounting solution is a recipe for trouble: apart from the obvious issues of theft and fraud, your payment terminals are under attack every time they are used. Without a mounting solution, they risk being dropped and the cables being damaged or tangled. Simple cost effective solutions can protect your hardware by lowering the interaction whereby the terminal is lifted and twisted.

Placing the payment terminal on a mount and thereby securing it to the work station is proven to reduce the number of faults. SpacePole Stack is a highly cost effective solution to these real life problems. Constructed with glass fibre enhanced plastics, the unit is the ideal answer to those challenges.

SpacePole Stack is compatible with our range of MultiGrip™ plates which act as the interface between the payment terminal and the stand. MultiGrip, the market leader, supports payment terminals from the world's leading manufacturers such as Verifone and Ingenico. To add a greater degree of flexibility at the point of payment, SpacePole Stack is sup-

plied with an adaptor that adds another 28mm or just over an inch to the height of the solution. This may improve accessibility or customer/operator rotation depending on the specific application.

Security tethers also ensure a high degree of security and in partnership with Kensington, we offer ClickSafe® security tethers. When affixed to SpacePole Stack, ClickSafe keeps the terminals safe from damage and theft and is in compliance with the latest PCI DSS directives on physical security at the Point of Sale.

SpacePole Stack provides a simple and effective mounting solution that is proven to reduce downtime and significantly lower repair or replacement costs to your payment terminal estate.

Features

- Wider body for improved cable management
- Large top support for improved stability of payment terminals
- Choose between two different heights, out of the box:
 - Height standard range: 96mm/3.77"
 - Height extended range: 124mm/4.88"
- Competitive price point
- Tilt: 70° / Rotation: 310°
- Footprint: 101,4mm/3.99"
- Compatible with MultiGrip™
 - M4 screws (suitable for re-mounting)
- Counter mounting options:
 - Self-tapping screws
 - Self-adhesive pad
- Added security options through ClickSafe®

Ergonomic Solutions

Ergonomic Solutions is the leading global provider of innovative and ergonomically designed technology mounting, mobility and security solutions for a wide range of static and mobile technology hardware at the point of sale, point of payment and point of service. Over 20 years of deep understanding of the evolution of technology hardware, ensures that the latest generation of our mounting solutions enable technology to provide a combination of best practice in customer experience, and demonstrable return on investment in a wide range of static and mobile applications.

Our services include design and development for customised solutions, and our influential Ergonomics Consultancy has advised many of the world's leading retailers. In addition, we are also an active participating member of the PCI Security Standards Council. Creators of SpacePole, Ergonomic Solutions is the global market leader, having supplied over 5 million unique SpacePole installations – and in the retail sector we supply over 60% of the global top 50 retailers, making our technology mounting solutions the preferred choice.
