More details can be found on www.Star-EMEA.com or in the new Star Kiosk Printer brochure

Chassis upgrade for TUP592 or TUP542

TUP542/592DP Chassis Part No 99250170
(contact Star for upgrade details)

The new TUP500DP Series is the direct response to our customers' requests for a more compact TUP500 Series while still providing the reliability and flexibility of an open frame printer designed specifically for the kiosk market.

The TUP500DP Series takes up to 25% less space than the original TUP592 while still being able to load a 10cm paper roll in diameter. Please note the TUP500 is supplied without interface with traditional and USB / LAN options available.

Dimensions

(w x d x h)mm	TUP592	TUP592DP
Mechanism	135 x 101 x 103	135 x 101 x 103mm

Original TUP592 model with 12.5cm paper roll holder & 25cm option

Usual conditions apply to specifications mentioned.

KIOSK

Additional Customer Software Tools available for all Star Open Frame printers includes:

- Remote Firmware Update Capability
- Auto Recovery after Power Loss
- Actual Print verification / Status

It is well known that **Star Micronics' Drivers** are the best in the industry due to the consistent investment, expertise and relationships developed with industry giants such as Microsoft and Apple and the UPOS committee. Not only do Star's sophisticated drivers support industry standards from Windows 7 to Linux or POS.NET, but Star is also prepared to supply source code for those kiosk builders who prefer to communicate directly with the printer's port thus providing flexibility at all levels. Mature Java-POST™ support has also been a top topic for kiosks for some time with Star's experience developed through so many installed applications

For more information on the TUP500DP Series, please see the TUP500 details on the www.Star-EMEA.com
